Interleaf
TECHNOLOGY

Solutions

Library Management Systems

As sole Irish agent for SirsiDynix, Interleaf Technology provides a choice of two library management systems (LMS); Horizon and Symphony.

Both systems enable cataloguing, circulation, acquisitions, academic reserves, materials booking and collection exchange and are used by hundreds of public libraries around the world.

Optional modules such as Smartphone app, SMS alerts, multimedia database of local history folklore, and Facebook interface as well as excellent reporting features are also available.

Library Discovery
A SirsiDynix product, this tool enables you to showcase your collection and allow users find what they are searching for. It also provides:
- Mobile browsing access
- Social reviews
- Cover-browsing views
- Search of online databases

Wi-Fi, PC Reservation and Print Management

Through its Irish agency for Aerohive, Interleaf provides cloud-based Wi-Fi access to library users with real-time authentication against the library system.

Interleaf's EMEA agency for all EnvisionWare products enables library staff to manage PC bookings as well as provide online booking facilities for customers.
The print management software manages copying and printing with several payment options.

eCommerce and Fines Payment

EnvisionWare's eCommerce Server enables fine and fee payment using cash, credit card or library account.

eBooks and eAudiobooks

Through its partnership with OverDrive, the world leader in eBooks and audio books, Interleaf Technology provides downloadable audio, music, video and eBooks. These are available for all major desktop and mobile devices including iPad, Android, BlackBerry and Windows.

Library Records Supply

Interleaf's SingleSource product enables, fast, reliable search for purchase of metadata for cataloguing new books, films, music and video games.

BookStream streamlines book processing with electronic invoicing and supply of MARC records. It can be integrated with any LMS.

Library Security and Self Service

Interleaf's security and self-service solutions supplied through its agency for 3M provides the most up to date RFID technology. RFID speeds up self- service and inventory control and enhances library security.

SelfCheck systems enhance library services and improve the library user's experience.

SmartKiosk provides self-service for fines payment, self-registration, print release and PC reservation.

Consumables

Interleaf also supplies a full range of library consumables including barcode scanners, book security tags, receipt printers, hardware, PCs and servers and people counters. These may be sold standalone or as part of Interleaf's other solutions.
